*Presented by:* Dr. Stephanie Taylor

The attached article by Dr. Stephanie Taylor was published in Engineered Systems magazine. The article lays out what we as an industry have to do to make sure our buildings are not just efficient, but they are also healthy – a dangerously overlooked design aspect.

With the focus of building design becoming more and more in line with efficiency, we often forget to consider the health of the occupants.

All stakeholders; physicians, architects, contractors, engineers and building owners must come together to ensure this is not forgotten.

Dr. Taylor's article is an awesome call to arms for all to follow.

Please attend the webinar to learn more!

## President's Message

As we approach Christmas and the end of the year I wanted to take a moment to wish all of you a happy holiday season. I hope that the year has been gainful and that you will prosper in 2017. We have an exciting webinar this month covering the importance of humidification. I hope that you will take something away that you can use in your professional career. I am sure you have been getting bombarded with the emails but I just wanted to remind you that the AHRI Expo/ASHRAE winter conference will be located in Las Vegas this year. It is rapidly approaching and will be hosted Jan 30 to Feb 1. Again, have wonderful holidays.  
Ethan Grover
