Programs: “Refrigerant Monitoring in VRF systems”
- Doug Allen

WHEN: Wednesday October 25th
Start time: 12:00

Location: Bake Works,
518 Mt Rushmore Rd
Rapid City, SD 57701

Biography:

Doug Allen has been with Mitsubishi Electric since August of 2016 working as the Commercial Area Sales Manager for Iowa, South Dakota, and Nebraska. Prior to starting his role at Mitsubishi Electric, Doug worked for Trane in the new equipment sales and turnkey solutions groups. Over the past six years, Doug has had the opportunity to specify and manage the installations of a variety of HVAC systems for commercial facilities; with a focus on VRF installations. Through his role at Mitsubishi Electric Doug looks forward to sharing his knowledge of VRF technology, while supporting and working with other industry professionals.

President’s Message

Greetings, I hope that you are all well and enjoying the fall.

This month's topic has been selected due to conversations that I have had with various professionals throughout the area. What do we do about refrigeration monitoring/evacuation requirements and VRF systems. Hopefully we will answer those questions. Please join us for ASHRAE standards 15/34 as applied to VRF presentation. If time allows Doug will also provide a presentation on water source VRF systems. Hope to see you there.

Thank you

Ethan Grover
President, GGAC and CTTC
