February 21, 2019 Tour - 11:45 AM to 1:00 PM:

Regional Health is well underway with a major expansion at the Rapid City Hospital. In order to provide all necessary utilities to this expansion, the existing Central Utility Plant (CUP) was expanded as a Make Ready Project. Major equipment added includes a 2250 kW generator, a 500 Hp boiler, and two 1000 ton centrifugal chillers and cooling towers. Our February program will be a tour of this CUP Expansion and the associated equipment. Our program will begin in Conference Room A on the second floor of the CUP (please see attached directions below). We will start with an overview of the expansion prior to taking the tour. The tour areas are still under construction so please bring your own PPE (hard hat, vest, and safety glasses) if you can. We will have PPE available for those who need it.

Lunch will be on your own and you are welcome to bring it for the beginning of the program.
