Programs: Immutrix/Intrinsic tour

- Jeff Barnes and Rob Moyers

WHEN: Thursday November 30th
Start time: 12:00

Location: Immutrix,
3620 Homestead Street
Rapid City, SD

Biography:

Jeff Barnes, President Intrinsic Materials Corp:

Mr. Barnes started his career in the medical field of Ophthalmology. During 22 years in the field, most of his accumulated experience is in medical device sales and marketing. His experience includes product development, product management, new product launch, field sales, sales management and sales strategy. Early in his career he worked as a Certified Ophthalmic Technician and Surgical Assistant and travelled extensively coordinating and assisting in surgical procedures involved with clinical trials utilizing new laser technology. Mr. Barnes received numerous awards for sales achievements and marketing accomplishments from Bausch & Lomb and Abbott. Mr. Barnes serves Intrinsic Materials Corp as its President and is tasked with overseeing details of product development, business strategy, and management of the ImmutriX Therapeutics' subsidiary. He is a hands on leader with all aspects of procurement, contract negotiations, materials manufacturing, scale-up production and regulatory compliance focus. All managers of the Intrinsic team report to Jeff for coordination and optimization of medical and industrial applications for the materials produced by Intrinsic.

Rob Moyers, Vice President Science and Technology

Mr. Moyers has been Vice President of Science and Technology since January 2016. He joined Immutrix on a part time basis in October of 2015 until assuming his current position. Prior to joining Immutrix, Mr. Moyers worked in the pharmaceutical industry, beginning in 1995 with Sigma-Aldrich where he was involved with custom contract production. Most recently he held sales and marketing positions with Janssen, a division of Johnson & Johnson, and AstraZeneca. In 1986 he served in the United States Air Force working for the minuteman weapons system maintenance team for 4 years. He received his Bachelor's of Science degree from the South Dakota School of Mines in 1994. His business experience also includes starting and successfully operating two businesses, one in specialty coffee roasting and the other in medical supplies.

President's Message

Greetings, I hope that this message reaches you in great health and spirits.

This month we will be getting back to basics... carbon that is. I have had the pleasure of meeting both tour providers and have toured this facility. Immutrix/Intrinsic are a local facility that produces synthetic carbon for medical purposes. I have found their research and results to be astounding. Please come and observe what this group of intelligent individuals is doing with the most basic of elements. CARBON!

Thank you

Ethan Grover
President, GGAC and CTTC
