Programs: “The Past, Present and Future of Indoor Air Quality Technology”

- Frank Stamataos

WHEN: Thursday February 15th
Start time: 12:00

Location: Bake Works,
518 Mt Rushmore Road
Rapid City, SD

Biography:

Frank Stamataos – President of SecureAire LLC

Frank brings more than 28 years of international management experience to the SecureAire executive team. Most recently, he was Director of Business Development for StrionAir, a wholly owned subsidiary of the Carrier Corporation a United Technologies Company (NYSE, UTX). Prior to its acquisition, StrionAir was a Venture Capital backed startup, which was turned around by the executive team. Prior to StrionAir, Frank was Vice President of Business Development for Willis Group Holdings (NYSE, WSH) in New York City. Frank also spent 16 years with Pall Corporation (NYSE, PLL), culminating as Senior Vice President of New Business Development and Strategic Marketing.

In his sales and marketing efforts, he developed multiple new markets and product lines for the company, growing businesses from zero to as much as \$250 million. He has turn-around experience and has worked extensively in Europe and Asia. Frank holds an MBA in Finance from Hofstra University and a BEE in Electrical Engineering from Villanova University.

President’s Message

Greetings, I hope that this message reaches you in great health and spirits.

This month’s topic is a personal one for me. As most of you know, my son struggled with a lung disease when he was much younger. Our lives were inundated with IAQ improvements at our old house. I am super excited that we are able to bring you this program. Hope to see you there.

Thank you

Ethan Grover
President, GGAC and CTTC
